## Sowing advice

Sowing density (germinated seeds/m<sup>2</sup>)

	October	November	December	January	February
Northern Italy	-	-	-	-	40-45
Central Italy	-	-	-	40-45	40-45
Southern Italy	-	30-35	30-35	35-40	40-45

## FEATURES

### Morpho-physiological characters

Plant height	100-105 cm
Seed	medium-small/oval/light brown
Flower	white/melanin patch present
Plant type	erect
Habitus	alternative
Cycle	medium

### Resistance to biotic and abiotic stress

Cold	excellent resistance
Water stress	good resistance
Lodging	excellent resistance
Rust	good tolerance

### Qualitative characters

1.000 seeds weight	320-400 gr
Proteins (%)	25-27%
