

Triticale

Quirinale

"Grains and silage"

Strengths

For the production of
grains and silage

Winter sowing

Sowing advice

Sowing density (germinated seeds/m²)

	October	November	December	January	February
Northern Italy	320-350	370-400	420-450	450-480	-
Central Italy	370-400	370-400	420-450	-	-
Southern Italy	370-400	400-430	420-450	-	-

FEATURES

Morpho-physiological characters

Plant height	105-110 cm
Ear	medium/white
Tillering	high
Habitus	winter
Earing	late

Qualitative characters

1.000 seeds weight	40-45 gr
Specific weight	70-75
Proteins (%)	13-15%

Resistance to biotic and abiotic stress

Cold	tolerant
Water stress	medium tolerance
Lodging	medium tolerance
Oidium	medium tolerance
Yellow rust	medium tolerance
Septoria	medium susceptibility
