

Chick-pea Pascià

Strengths

Beige seed, wrinkled
large caliber

Medium tolerance to
Ascochyta rabiei

Appreciated
by the food industry

Sowing advice

Sowing density (germinated seeds/m²)

	October	November	December	January	February	March
Northern Italy	-	-	-	-	40-45	45-50
Central Italy	-	-	-	40-45	40-45	45-50
Southern Italy	-	30-35	30-35	35-40	40-45	40-45

FEATURES

Morpho-physiological characters

Plant height	60-65 cm
Seed	beige/wrinkled/large caliber
Flower	white
Plant type	semi-erect
Habitus	alternative
Cycle	medium-early

Resistance to biotic and abiotic stress

Cold	good resistance
Water stress	good resistance
Lodging	excellent resistance
Dehiscence	excellent resistance
Ascochyta	medium tolerance

Qualitative characters

1,000 seeds weight	400-500 gr
Proteins (%)	21-22%
